## Maintain

In order to use our products effectively, please do an all-around clean every six months. You can use hair-dryer or dry brush to get rid of the dust on the surface, then use soft cloth with alcohol to clean the product. Dust not only affect the out looking, but also badly impair the heat dispersion and shorten the life span. Please don't use water, gasoline and Tiana to clean it, or will destroy the lamp or its color. Every 3 or 5 years, please ask the specialists to check the lights and chang the broken components in case of fire.
